

Maria T. Zuber is the vice president for research and the E. A. Griswold Professor of Geophysics at the Massachusetts Institute of Technology. She oversees MIT Lincoln Laboratory and more than a dozen interdisciplinary research laboratories and centers. Zuber's research bridges planetary geophysics and the technology of space-based laser and radio systems. Since 1990, she has held leadership roles on ten NASA missions, most notably serving as Principal Investigator of the Gravity Recovery and Interior Laboratory or GRAIL mission. In 2004, appointed by President George W. Bush, she served on the Presidential Commission on the Implementation of United States Space Exploration Policy. In 2013, President Barak Obama appointed her to the National Science Board and in 2018 she was reappointed by President Donald J. Trump. She served as Board Chair from 2016-2018.
